

PLOT EVALUATION VEGETATION

Plot #
Date:

Plant Community Type

Compare the plants in your plot to the plant list and determine to which plant community to which your plot most likely belongs. Here's how: Look at the plants on your 'Plot Vegetation' form. Compare the plants in your plot to the 'Plant Community Lists'. Write the name of the list that has plants most similar to your plot in the space below.

Layers

Look at your plot, plot map and assessment form. Are there any missing plant layers? What plants might be added to your plots to create these layers?		
Missing Layer	Plant Species	How many more plants?

Plant Management

Which plants in your plots are non-native? Research management strategies for removing these plants from the plot (see Starflower Weed ID Cards).		
Plant (species, if known)	Removal Priority (high, medium, low)	Removal method / comments

Stewardship Activities

List the stewardship activities that we can plan to help our native plant plots be successful.
