

PLOT MONITORING INSPIRATION

What monitoring activity would provide meaningful data to show that the plot restoration is successful?

Activity 1: _____

What meaningful data will this provide?

How often and what time of year should monitoring data be collected to be useful?

Daily/ Weekly/ Every two weeks/ Monthly Time of year: _____

How will this data help in restoring native plants and wildlife to this habitat?

What are the results you predict you will obtain from doing this activity?

What is another monitoring activity would help support the data from Activity 1?

Activity 2: _____

What meaningful data will this provide?

How often and what time of year should monitoring data be collected to be useful?

Daily/ Weekly/ Every two weeks/ Monthly Time of year: _____

How will this data help in restoring native plants and wildlife to this habitat?

What are the results you predict you will obtain from doing this activity?

What is another monitoring activity that would provide meaningful data to show that the plot restoration is successful?

Activity 3: _____

What meaningful data will this provide?

How often and what time of year should monitoring data be collected to be useful?

Daily/ Weekly/ Every two weeks/ Monthly Time of year: _____

How will this data help in restoring native plants and wildlife to this habitat?

What are the results you predict you will obtain from doing this activity?
