

The leaf is leathery and thick. The edges are toothed, and the outer half of the leaf is lobed.

Sharp thorns along branches can be up to 1" long.

This deciduous shrub can grow to 30' tall.

White flowers grow in clusters and have an unusual odor.

The fruits look like small apples and change from red to black.

Black Hawthorn

Crataegus douglasii

PNW Native Plant
PPNC: 73
