

These herbaceous perennials grow 6-12" tall.

Flowers turn into clusters of rounded seedpods.

Flowers have five sharply swept back petals and a pointed stamen tube.

D. hendersonii

D. pulchellum

Egg-shaped to spoon-shaped leaves (varies by species) grow from a basal clump.

D. pulchellum

Shooting Star Dodecatheon spp.

PNW Native Plant
PPNC: 324
