Cooley’s Hedge Nettle
Stachys cooleyae

This herbaceous perennial grows 24”-60” tall from rhizomes.

Leaves are opposite, and heart to egg-shaped with round-toothed edges and have an unusual smell.

The unbranched stem is square. Leaves and stems are hairy but do not have stingers (as does stinging nettle, a similar species).

The unbranched stem is square. Leaves and stems are hairy but do not have stingers (as does stinging nettle, a similar species).

Tubular flowers are arranged on stem ends.

Nutlets form in dry seed cases.
