

General: Evergreen perennial; up to 21" tall

Young growth

Form: Spreading basal clump which forms masses

Flower: Yellow, shiny buttercup flower

Management Strategies

- Always remove
- Fibrous roots along stolons: remove major
- Primary spread: Stolons

Check with parks department or school district for proper disposal.

Creeping Buttercup

Ranunculus repens

A Non-native Plant

WPGS: 170

Native Look-alike

Western buttercup, R. occidentalis, is more upright, has basal leaves with three wedge-shaped divisions and does not spread by stolons.
