Herb-Robert, Stinky Bob
Geranium robertianum
A Non-native Plant

Form: Rosette with weak upright to spreading branches, forming masses

General: Annual, biennial or short-lived perennial; up to 16” tall

All parts have a strong odor when crushed

Native Look-alike
Dicentra formosa, Pacific bleeding heart, has similar young growth in early spring, but is hairless, grows from rhizomes, has upright stems and doesn’t have a strong odor.

Management Strategies
• Non-designated noxious weed
• Always remove
• Fibrous root: Remove major
• Primary spread: Seed
Note: Aggressively dominates; tolerates deep shade and spreads rapidly
Check with parks department or school district for proper disposal

WPGS: 222
