

General: Perennial; 10"-30" tall

Shoots emerging through duff on forest floor

Form: Basal clump

Flowers: Purple, sometimes pink or white, on long stalks

Management Strategies

- Always remove
 - Bulbs: Remove all bulblets
 - Primary spread: Seed, bulblets
- Note: Can dominate disturbed shady areas

Check with parks department or school district for proper disposal.

Hybrid Bluebells

Hyacinthoides x variabilis

A vigorous hybrid of Spanish and English Bluebells

A Non-native Plant

WPGS: 326

Native Look-alike

Camas, Camassia spp., have similar form, with wider leaves, and different flower shapes.

Onions, Allium spp., have similar leaves, which smell like onions, and different flowers.
