

General: Perennial; 1'-5' tall

Tiny holes in the leaves are evident when held up to the light.

Photo by Heidi Bohan

Form: Branched upright leafy stalks

Caution: Somewhat phytotoxic: people with fair skin should handle with care to avoid skin reactions, especially on sunny days.

Flowers: Yellow, in branched clusters

Need young plants, seedhead?

**Management Strategies**

- Non-designated noxious weed
- Always remove
- Thickened rhizome: Remove all
- Primary spread: Seed, rhizomes

Check with parks department or school district for proper disposal.

WPGS: 230

**St. John's-wort**  
*Hypericum perforatum*

A Non-native Plant

**Native Look-alike**

*Bog St. John's-wort, Hypericum anagalloides*, does not have perforated holes in the leaves, remains small, and grows in wet bogs.
