

New growth is arranged in flat layers.

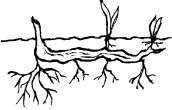

General: Deciduous perennial; 3'-6' tall

Form: Basal erect clump

Management Strategies

- Non-designated noxious weed
- Always remove
- Stout rhizomes: Remove all
- Primary spread: Rhizomes, seed

Check with parks department or school district for proper disposal.

WPGS: 334

Yellow Flag Iris
Iris pseudoacorus
A Non-native Plant

Native Look-alikes

Cattail, *Typha latifolia*, has similar new growth in spring but leaves are arranged in rounded layers rather than flat. *Iris tenax* and *I. douglasii* have similar, but much thinner, leaves 12"-24" long, and purple-blue flowers.

Typha latifolia (Cattail)

Rounded stalks

Iris tenax (Oregon iris)
